

HERE'S SOMETHING TO **THINK TWICE** ABOUT YOUR **CURRENT PAYMENT GATEWAY**

Did you know that asking the right questions can get you **40% more savings** out of your payment processing costs?
We want to help you maximise your payment gateway,
so here are some questions we can talk about to make it happen:

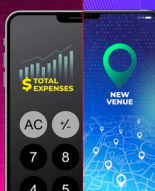

HIDDEN FEES OR TRANSPARENCY?

Are you paying for more than the rate your payment processing provider promised?

If you are, you might be losing revenue paying hidden fees like yearly/monthly fees, batch fees, and review trackers.

EXPENSES OR EXPANSION?

How much are you possibly losing from paying published rates instead of effective rates?

Better rates can help you save for business expansion. You can budget effectively with pricing transparency.

SCAM OR SAFE?

Are you safe against chargebacks from fraud?

3D Secure 2.2 feature keeps you safe from unnecessary chargebacks and losing money from fraudulent activities.

LIABILITY OR RELIABILITY?

Do you have a reliable backup for transactions in case of downtimes?

Your payment gateway should be able to continue processing transactions manually until you're back online during internet downtimes.
